LINKING GREAT PARTNERS

THE UNBOXING EDITION

1. WHAT IS THE LGP CHALLENGE?

The LGP Challenge is the “showroom” where LGP companies present the products/services/solutions they are developing. All clients and other invited guests will attend this major event. The goal of the event is to present the result of the projects, with a clear focus on the product, its applications and potential market advantages versus competition. The presentations should not include technical details (unless these are clear advantages of the product!) since these have already been addressed in the intermediate presentations. LGP Challenge is the end of the journey, your time to shine!
